Javier **Montero**

Software Engineer   New York, NY

917 · 861 · 0773 | monterodotjavier@icloud.com | in javierlmontero | monterojavier

Since my interest in becoming a software engineer during my first hackathon, I have been passionately chasing this career goal. I've studied basic web development at The Knowledge House. Afterward, I was accepted into Fullstack Academy's Fellowship where the coursework focused on front- and back-end development. I look forward to continuing my career path with a growing and innovative company!

Technical Skills

Languages	JavaScript (proficient), Ruby (novice), MATLAB (familiar) , Arduino (familiar)
Web Development	Node.js, HTML5, CSS3, Bootstrap, Material-UI, Materialize, Express.js, React.js, Redux.js, Vue.js
Database	Sequelize, PostgreSQL
