

Javier Montero, Software Engineer

(917) 861-0773 | monterodotjavier@icloud.com | <https://www.linkedin.com/in/javierlmontero>

PROFICIENCIES

Languages: JavaScript, C++, HTML, CSS, SQL, Ruby, TypeScript, Python, Java

Frameworks: React, Express, Angular, Vue

Tools: Firebase, Vercel, Netlify, Docker, GitHub, MySQL, SQLite, Sequelize, Node.js, Redux, Git

EXPERIENCE

Software Engineer Mentor - Fullstack Academy of Code

Feb 2023 – Present

- Mentored more than 500 students in full-stack web development, including JavaScript, React, Node.js, SQL, and Python.
- Conducted code reviews and guided debugging, architecture, and technical interview preparation.
- Led workshops and lectures to bridge curriculum concepts with real-world engineering practices.
- Supported capstone teams through project planning, development, and deployment.

Software Engineer - New York Life Insurance

Jan 2026 – June 2026

- Delivered highly scalable frontend features for R&D team's insurance application used by 13,000 agents.
- Developed and implemented pixel-perfect, responsive, cross-platform design with an Agile/Scrum workflow.
- Worked closely with product managers, business analysts, and QA engineers to define and deliver new features.

Software Engineer - Google LLC

Oct 2021 – June 2023

Front End - Authorized Buyers

- Delivered an API for state-based ad targeting that improved advertiser efficiency and increased revenue.
- Built privacy-preserving logic to exclude small geographic regions using Google's internal IP tools.
- Designed and implemented a data pipeline that generated event records 85% faster.

Back End - Secure Data Collection Framework

- Built a view-generation pipeline that reduced security runtime statistics query times by 87.5%.
- Implemented a rolling bloom filter for efficiently deduplicating high cardinality runtime metrics.

Software Engineering Intern - Stride Consulting

Sept 2020 – Dec 2020

- Updated and deployed the company's intranet using Ruby on Rails.
- Added and enhanced website features across the internal platform.
- Created automated tests using Selenium, Capybara, and Jest.

PROJECTS

Pawdoption, New York, NY

June 2022

- Built a full-stack dog adoption application using Angular, Express, Sequelize, and SQLite.
- Designed REST APIs and implemented authentication with bcrypt password hashing.
- Developed responsive UI components and backend data models.

Technologies used: Angular, Typescript, Express.js, socket.io, cypress, Sequelize, SQLite3

Translating Instant Messenger, New York, NY

Sept 2020

- Developed a desktop messaging application that translated conversations in real time.
- Integrated Google Translate API for multilingual communication.
- Implemented WebSocket-based messaging with Socket.IO.

Technologies used: Electron.js, socket.io, Node.js, Google Translate API, Express.js, Materialize

EDUCATION

Multiverse Bootcamp - *Software Engineering* - New York, NY
Fullstack Academy of Code - *Web Development*- New York, NY
SUNY New Paltz - *Mechanical Engineering* - New Paltz, NY
